Event Enrollment

This application will help the students at University of Wisconsin Milwaukee to view, register and process payments for any events that are held within the university.

All the students would be able to view and register for events like Movie Nights, Career fair, meet and greet at Garland Hall and many others. Our application would be a one stop place where all the events held in the University of Milwaukee can be booked by the students only.

Our goal is to provide all the organizations a place to promote their programs and for all the students to enroll in these programs. Any event booked on the platform can be accessed through the application, this makes delivery of the tickets easy and convenient. Any events which require payments for enrolling can be processed from the application.

Authentication or sign into the application is through an official student mail id that is registered with the university. An approval is always required to access the application via Microsoft Authentication.

All the events will be updated on the application by our IT people who are also a part of our customer service.

Our application has four tabs namely events, calendar, bookings and customer support. Any information related to events such as time, date, venue, pricing (free or paid event) and short description about the event would be displayed in the events tab. There is a calendar tab included in the application, which displays all the events that are being held during the semester. The bookings tab will contain all the event tickets (QR codes) that the student has registered to. If there is any assistance required by the student, they can always contact through the customer service tab and the support will be provided 24/7.

For any issues that are faced either by the students or by the organizations can contact our 24 hour customer support. We would be promoting the upcoming events that are held in the university.
